Geotechnical Testing Journal
Table of Contents
Volume 18, 1995

No. 1, March

A Simulation of Tube Sampling Effects on the Stiffness of Clays—CHARLES C. HIRD AND AHMED R. HAJJ 3

A Modified Commercial Triaxial Testing System for Small Strain Measurements: Preliminary Results on Pisa Clay—DIEGO C. F. LO PRESTI, ORONZO PALLARA, AND IGNAZIO PUCI 15

Empirical Theory of Vacuum-Assisted Steam Stripping of Organic Pollutants from Contaminated Soils—ARTHUR E. LORD, JR. 32

Treatment of Oil-Contaminated Soils for Identification and Classification—NAMUNU J. MEEGODA AND PRASANNA RATNAWEERA 41

Techniques for Assessing the Nonlinear Resilient Response of Unbound Granular-Layered Structures—INGO DASTICH AND ANDREW DAWSON 50

Consolidation Behavior of Soils—A. SRIDHARAN, K. PRAKASH, AND S. R. ASHA 58

A Direct Simple Shear Device for Measuring Small-Strain Behavior—MACAN DOROUDIAN AND MLADEN VUCETIC 69

Permeability and Compressibility Behavior of Bentonite-Sand/Soil Mixes—N. S. PANDIAN, T. S. NAGARAJ, AND P. S. R. N. RAJU 86

Application of the Bubble Point Method to the Characterization of the Pore-Size Distribution of Geotextiles—SHOBHA K. BHATIA AND JENNIFER L. SMITH 94

Technical Note: A Resistance Wire Transducer for Circumferential Strain Measurement in Triaxial Tests—PETER SKOPEK AND GERRY P. CYRE 106

Technical Note: Effect of Simulated Roots on the Permeability of Silty Soil—M. A. GABR, M. AKRAM, AND HUGH M. TAYLOR 112

Technical Note: Improvements to a Stress-Path Triaxial Cell—STEFANO AVERSA AND FILIPPO VINALE 116

Technical Note: Granulometric Evaluation of Particle Size Using Suspension Pressure During Sedimentation—ZHONGJIE ZHANG AND MEHMET T. TUMAY 121

Questionnaire on Subject Areas of Authors and Reviewers 130

ASTM Task Group on Data Automation: Questionnaire for Geotechnical Laboratories 132

No. 2, June

A Review of Instrumentation for Measuring Small Strains During Triaxial Testing of Soil Specimens—GRAHAM K. SCHOLEY, J. DAVID FROST, DIEGO C. F. LO PRESTI, AND MICHELE JAMIOLKOWSKI 137

Soil-Geogrid Reinforcement Interaction by Pullout and Direct Shear Tests—MAROLO C. ALFARO, NORIHIKO MIURA, AND DENNES T. BERGADO 157

A Dual Interface Apparatus for Testing Unrestricted Friction of Soil Along Solid Surfaces—SAMUEL G. PAIKOWSKY AND CHRISTINE M. PLAYER 168

Rigid Plate Settlements on Soils with Varying Deformation Properties—YAKOV M. REZNIK 194

Effects of Sustained and Repeated Tensile Loads on Geogrid Embedded in Sand—YONGLI MIN, DOV LESHCHINSKY, HOE I. LING, AND VICTOR N. KALIAKIN 204

External Measurement of Axial Strain in the Triaxial Test—LUIZ A. BRESSANI 226

© 1995 by the American Society for Testing and Materials

Geotechnical Properties of Municipal Solid Waste—MOHAMMED A. GABR AND STEPHEN N. VALERO 241

Analysis and Estimation of the Coefficient of Consolidation—P. S. R. NARASIMHA RAJU, N. S. PANDIAN, AND T. S. NAGARAJ 252

Technical Note: Screw Plate Insertion in Sand—PETER T. BROWN 259

Technical Note: Geosynthetic/Soil Interface Friction Angles Using a Rotation Shear Device—MARK D. EVANS AND THOMAS J. FENNICK 271

Technical Note: The Rapid Determination of the Moisture-Retention Characteristics of Soil—A. B. FOURIE, G. PAPAGEORGIOU, AND G. E. BLIGHT 276

Technical Note: Geotechnical Properties of the Maryland-Sanders Lunar Simulant—D. J. GOODINGS AND C. P. LIN 286

Technical Note: A Pluvial Deposition Method to Reconstitute Well-Graded Sand Specimens—CARMELO FRETTI, DIEGO C. F. LO PRESTI, AND SERGIO PEDRONI 292

Book Review: Dynamic Vibration Absorbers: Theory and Technical Applications—G. W. HOUSNER 299

Questionnaire on Subject Areas of Authors and Reviewers 300

ASTM Task Group on Data Automation: Questionnaire for Geotechnical Laboratories 302

No. 3, September

Study of Geoprocesses with Complementary Mechanical and Electromagnetic Wave Measurements in an Oedometer—MOHEB FAM AND CARLOS SANTAMARINA 307

Influence of Apex Angle on Cone Penetration Factors in Clay—VINCENT SILVESTRI AND YASSER FAHMY 315

Assessing Frost Damage in Compacted Clay Liners—CRAIG H. BENSON, EDWIN J. CHAMBERLAIN, ALLAN E. ERICKSON, AND XIAODONG WANG 324

Collapse Behavior of an Artificially Cemented Clayey Silt—SUDHAKAR M. RAO, ASURI SRIDHARAN, AND KONANUR P. RAMANATH 334

The Role of Jute Geotextile/Slurry Interface Friction on the Bearing Capacity of Clay Slurry—SIEW-ANN TAN, NAIM MUHAMMAD, AND G.-P. KARUNARATNE 342

Pile Skin Friction in Sands from Constant Normal Stiffness Tests—JAIME T. TABUCANON, DAVID W. AIREY, AND HARRY G. POULOS 350

Strain Rate Effects on Shear Modulus and Damping of Normally Consolidated Clay—SATORU SHIBUYA, TOSHIYUKA MITACHI, FUMIHIKO FUKUDA, AND TAKAHIRO DEGOSHI 365

Measurement of In Situ Density of Sand in a Chamber by Using a Thermal Conductivity Penetrometer—GURDEV SINGH, BRAJA M. DAS, AND M. K. CHONG 376

Discussion on "An Approximate Method for Estimating the Consolidation Behavior of Soft Sensitive Clays" by R. C. Joshi, Gopal Achari, and Fred J. Griffiths—A. VATSALA, T. S. NAGARAJ, AND B. R. SRINIVASA MURTHY 384

Closure—R. C. JOSHI, G. ACHARI, AND F. J. GRIFFITHS 386

Discussion on "A Critical Evaluation of the Gradient Ratio Test" by R. Jonathan Fannin, Yoginder P. Vaid, and Yucheng Shi—M. H. AKRAM AND M. A. GABR 389

Closure—R. J. FANNIN, Y. P. VAID, AND Y. SHI 389

Discussion on "Laboratory Filter Paper Suction Measurements" by Sandra L. Houston, William N. Houston, and Anne-Marie Wagner—ANDREW M. RIDLEY 391

Closure—S. L. HOUSTON, W. N. HOUSTON, AND A.-M. WAGNER 394

Questionnaire on Subject Areas of Authors and Reviewers 398

ASTM Task Group on Data Automation: Questionnaire for Geotechnical Laboratories 400

No. 4, December

Use of Stereophotogrammetry to Analyze the Development of Shear Bands in Sand—WENDELL W. HARRIS, GIOACCHINO VIGGIANI, MICHAEL A. MOONEY, AND RICHARD J. FINNO 405

Model Study on the Failure Mechanism of Soil-Nailed Structure Under Surcharge Loading—DONG-SOO KIM, ILAN JURAN, ROBERT NASIMOV, AND SERGEY DRABKIN 421

Apparatus and Procedure for an In Situ Collapse Test—HISHAM H. H. MAHMOUD, WILLIAM N. HOUSTON, AND SANDRA HOUSTON 431

Size Effects for Multi-Axial Tension Testing of HDPE and PVC Geomembranes—SCOTT M. MERRY AND JONATHAN D. BRAY 441

Bearing Capacity of Highly Frictional Material—STEVEN W. PERKINS 450

Investigation of Vibration-Induced Settlement Using Multifactorial Experimental Design—DONG-SOO KIM AND SERGEY DRABKIN 463

A New Fall Cone Device for Measuring the Undrained Strength of Very Weak Cohesive Soils—DIANA V. ZREIK, CHARLES C. LADD, AND JOHN T. GERMAINE 472

Soil Air Permeability: Threshold Gradient and Anisotropy—NEERAJ SINHA, SHAWN A. RODECK, MAHER T. OMAR, BRUCE A. DEVANTIER, AND BRAJA M. DAS 483

Discussion on "Evaluation of Static Capacity of Deep Foundations from Statnamic Testing" by Dan Brown—GEORGE G. GOBLE, FRANK RAUSCHE, AND GARLAND LIKINS 493

Closure—D. BROWN 494
